### **UN-SPIDER:**

# Evidenz dissemination and recommended practices

EvIDENz mid-term workshop

21-22.09.2017

UN Campus, Bonn, Germany

### **Evidenz dissemination**

- to Sendai framework related events, working groups and partnerships (e.g. GP-STAR)
- To UNCCD, UNFCCC environment
  - Africa Drought Conference, Windhoek declaration
  - Research dialogue, SBSTA, Climate Change Convention
- Testing of developed workflows
- Recommended practice
- Dissemination through Knowledge Portal

The Windhoek Declaration for Enhancing Resilience to Drought in Africa

We, the African Member States and Parties to the United Nations Convention to Combat Desertification (UNCCD), Ministers, Heads of Delegation and Experts, attending the High Level Meeting of the first African Drought Conference (ADC);

Having met in Windhoek, Namibia from the 15 - 19 August 2016;

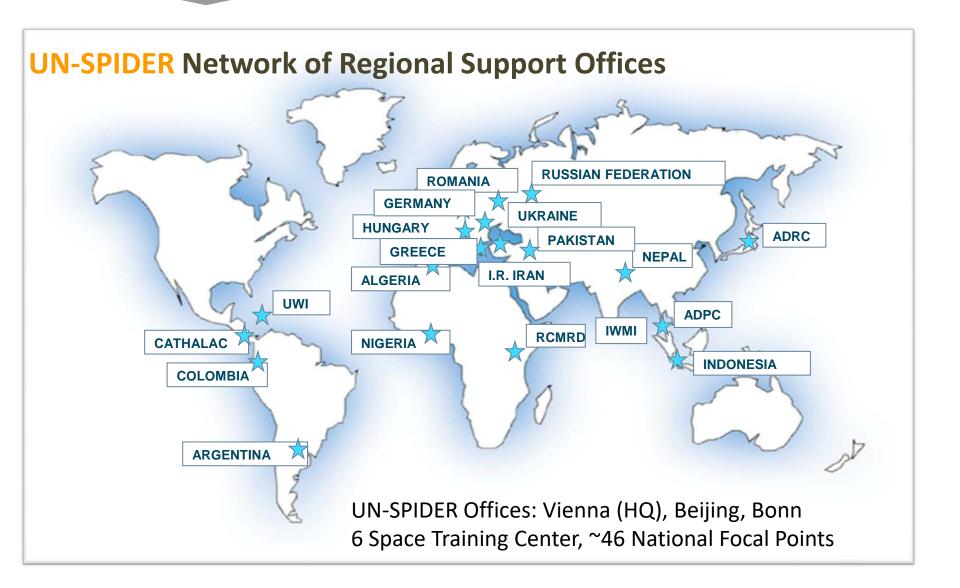

### **UN-SPIDER:** Mission statement

"Ensure that all countries have access to and develop the capacity to use all types of space-based information to support the full disaster management cycle."

General Assembly Resolution 61/110 (2006)

## Key tasks

# Technical Advisory Support

UN-SPIDER provides support to countries in assessing national capacity and in evaluating disaster and risk reduction activities, policies and plans

#### Knowledge Portal

The UN-SPIDER Knowledge Portal is a web-based tool for information, communication and process support

# **Capacity Building**

UN-SPIDER facilitates capacity building and institutional strengthening, including the development of curricula and an e-learning platform (e-SPIDER)

# Fostering Cooperation

UN-SPIDER fosters alliances and creates forums where both space and disaster management communities can meet

and many more...

### **UN-SPIDER Bonn Office**

Management to enable
Member States to generate
and use space-based
information in all phases
of the disaster
management cycle

# Knowledge Management efforts

# Discovering relevant knowledge and information

Discovery

- Finding and extracting information from selected websites and portals (space agencies, disaster management organizations, partners, news webpages, etc);
- Discovering information from publications and documents from partner institutions.

# Facilitating access to knowledge and information

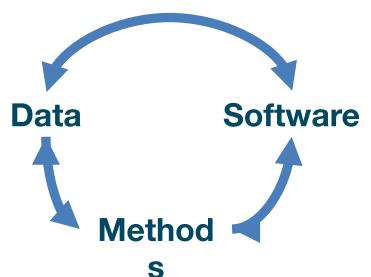

Newsletters and publications

UN-SPIDER Knowledge Portal

# Facilitating access to data, information and knowledge

### **Links and Resources**

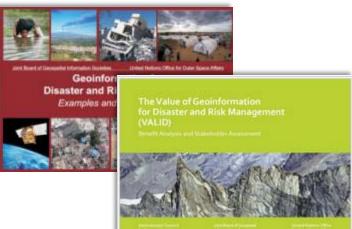

### **Space Application Matrix**

# Awareness raising

- Participation in events organized by partners;
- Mobilization of experts to events organised by partners;
- Participation in networks (IWG-SEM, IN-MHEWS, etc);
- Publication of Newsletters, monthly updates, Booklets; and
- Social media efforts

## Facilitating the Exchange of Knowledge

# From Science to Practice...

How can I apply these methods?

Where do I get the data and software?

Are the methods robust?

Is the method transferable, i.e. can I apply it in my country?

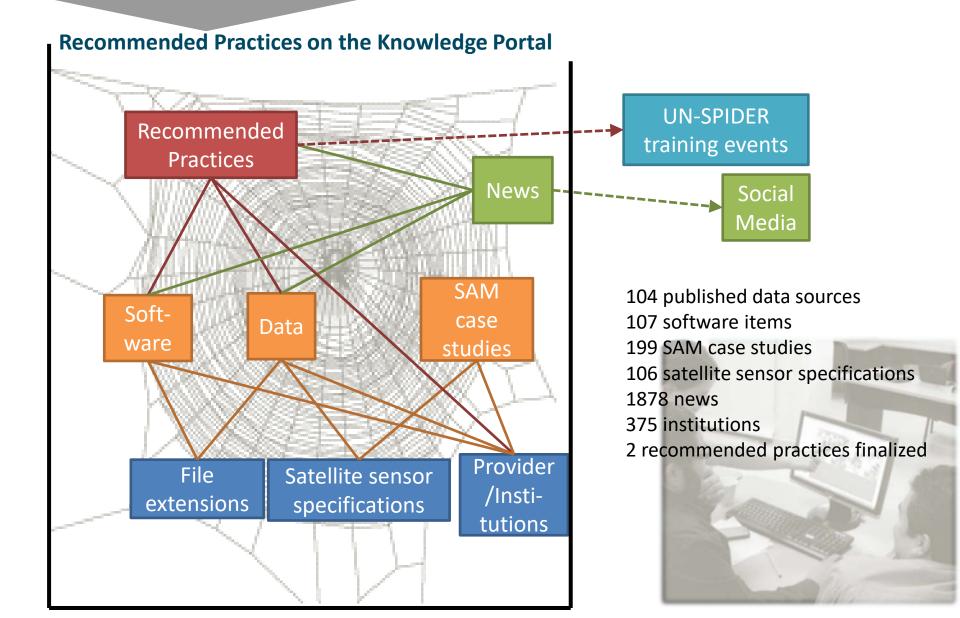

Do I have sufficient capacity and resources to apply the method?

How accurate and reliable are the results?

How do I interpret the resulting image?

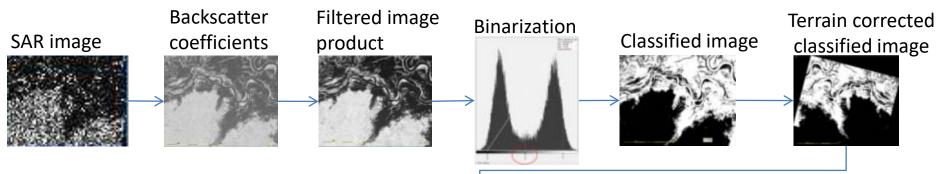

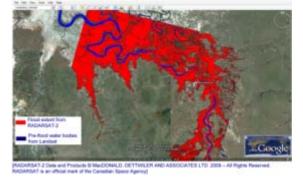

## **Recommended Practice Flood Extent Mapping**

How can I create a flood extent map based on SAR data using free software?

Recommended practices by UN-SPIDER's Ukrainian Regional Support Office provides step-by-step instructions.

#### Flowchart

### Recommended Practice: Drought monitoring using the Vegetation Condition Index (VCI)

Drought monitoring is an important component in drought early warning systems. This practice shows how to monitor the impacts of meteorological drought on natural vegetation using MODIS optical satellite imagery.

Step by Step

#### In Detail

#### Objective:

The purpose of this recommended practice is to monitor impacts of meteorological drought on natural vegetation (rain fed, range land & forest). Availability, simplicity, free of charge data, good research literature and citation, minimum requirements of inputs are main criteria, which have been considered to define the methodology.

Disaster Cycle Phase:

### **GP-STAR Terms of Reference**

#### **Purpose of GP-STAR:**

 is to facilitate the use of Earth Observation as well as satellite-based technology and application ... for application in the context of the Sendai Framework for Disaster Risk Reduction 2015-2030 (Sendai Framework)

#### Partners (29):

# UNISPACE -

Invitation to Conference

Nov 22-24, 2017

Bonn, Germany

22-24 November 2017 United Nations Campus, Bonn, Germany

### Dissemination

- at relevant events
- using UN-SPIDER networks
- Knowledge Portal
- Testing of workflows
- Recommended practices
- Use in technical advisory support, if appropriate
- Awareness raising

### Acknowledgment

We would like to acknowledge:

BMWi for funding the EvIDENz project

Raumfahrtmanagement at DLR for facilitating the process
