

# SPACE APPLICATION CENTRE FOR RESPONSE IN EMERGENCY AND DISASTERS (SACRED)

- **THE CENTRE PROVIDES SPACE BASED INFORMATION TO NATIONAL / PROVINCIAL DISASTER MANAGEMENT AGENCIES TO RAPIDLY ASSESS THE EXTENT OF NATURAL DISASTERS AND DAMAGES TO HUMAN LIVES, PROPERTY AND INFRASTRUCTURE.**
- **THE CENTRE ALSO PROVIDES ASSISTANCE TO REGIONAL COUNTRIES IN CASE OF NATURAL DISASTERS.**

# INTERNATIONAL COOPERATION IN DISASTER MANAGEMENT

## PARTNERS

UN SPIDER

Sentinel Asia

SUPARCO

## International Charter Space and Major Disasters

- ✓ The International Charter aims at providing a unified system of space data acquisition and delivery to those affected by natural or man-made disasters through Authorized Users
- ✓ On Behalf of NDMA, SUPARCO has been registered with Charter as Authorized User (AU)
- ✓ SUPARCO is host to UN-SPIDER Regional Support office in Pakistan
- ✓ SUPARCO is also Member of JPT-3 project of Sentinel Asia and is registered as Data Analysis Node (DAN)

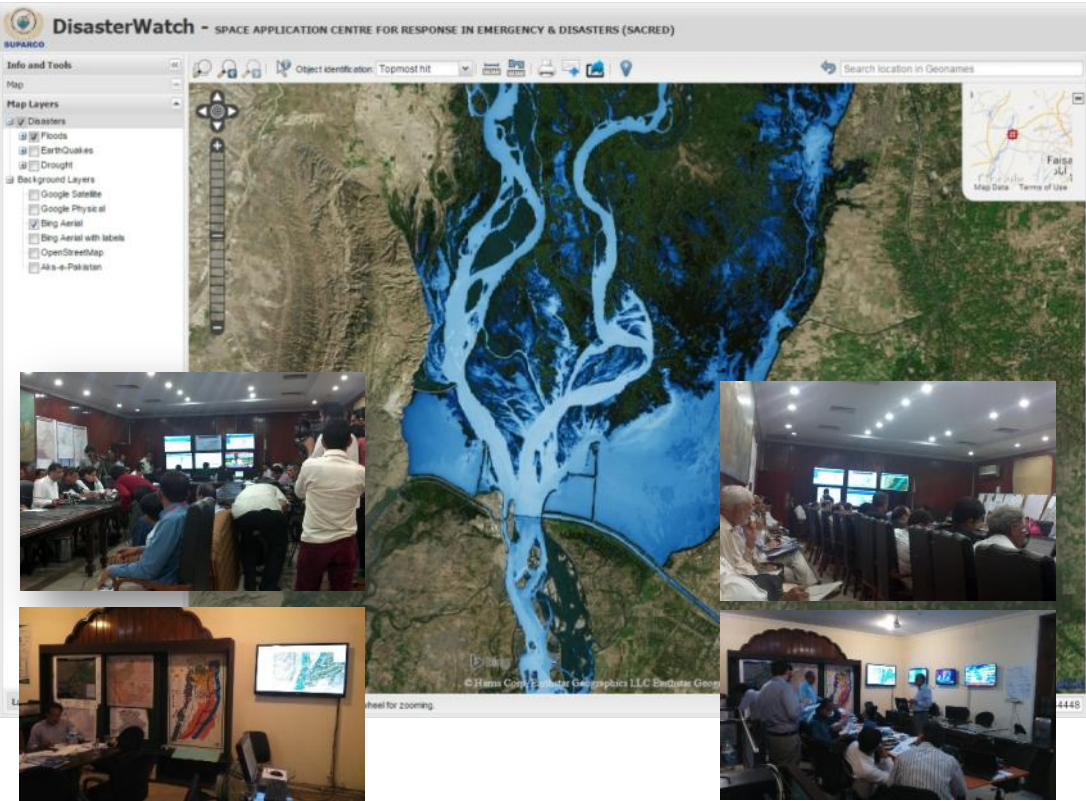

# Disaster Monitoring

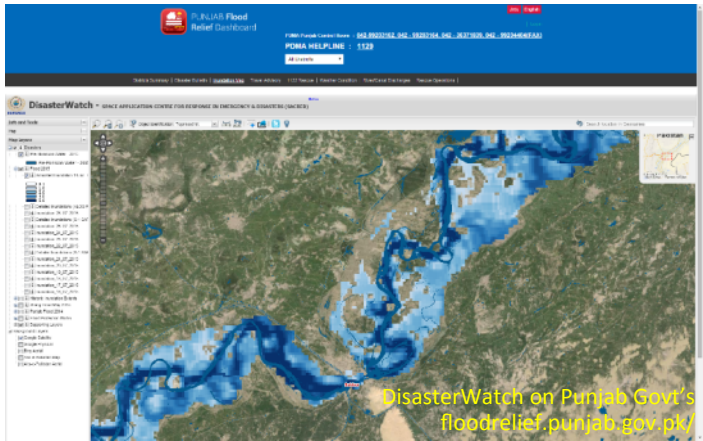

During Natural Disasters, SUPARCO provided technical support to various national Organizations NDMA, PDMAs and International Agencies ICIMOD, UN-FAO etc

# SPATIAL TECHNOLOGIES FOR FLOOD MANAGEMENT

## NEAR REAL-TIME SUPPORT THROUGH DISASTERWATCH

SUPARCO's DisasterWatch web portal being utilized and referenced at a press-conference in Flood control room, S&GAD (Civil Secretariat) Punjab and PDMA Punjab control room.

DisasterWatch on Punjab Govt's floodrelief.punjab.gov.pk/

DisasterWatch on NDMA's disasterinfo.gov.pk

- THE INFORMATION IS DISSEMINATED TO FLOOD MANAGEMENT STAKEHOLDERS AT EVERY LEVEL THROUGH INDIGENOUSLY DEVELOPED WEB-BASED VISUALIZATION PLATFORM 'DISASTERWATCH', PRINTED MAPS AND STATISTICS.
- DISASTERWATCH PORTAL HAS ADDITIONALLY BEEN INTEGRATED AT WITH THE NDMA AND PUNJAB GOVERNMENT'S OFFICIAL WEBSITES, THROUGH WHICH, RESCUE / RELIEF AND FLOOD MANAGEMENT ORGANIZATIONS SUCH AS RESCUE 1122, PID, BoR, P&D ACCESS LATEST SATELLITE BASED DATASET AND SPATIAL INFORMATION FOR PLANNING AND RELIEF ACTIVITIES.

# Thansing VDC, Nuwakot District, Nepal - DAMAGE IDENTIFICATION

The 2015 Nepal earthquake was a magnitude 7.8 earthquake that occurred on Saturday 25 April 2015, with the epicenter approximately 28 km (18 mi) east-southeast of Lamjung and 81 km (50mi) NW of Kathmandu, Nepal. This is a post-earthquake map of Thansing VDC, Nuwakot District. The damage is marked for built up areas only. This analysis is based on 0.31 m resolution WorldView-3 imagery acquired two days after the earthquake and was made available by USGS at HDS Portal. This analysis is yet to be validated in the field. The map was produced at SUPARCO on April 30, 2016. Projection & Datum: WGS 84

- Background Layers
  - Google Satellite
  - OpenStreetMap

The map shows a satellite view of a river basin with overlaid flood damage data. The damage is color-coded: blue for Cotton, green for Rice, and orange for Sugarcane. The map includes a search bar for "Search location in Geonames" and a "Layer order" panel at the bottom left. The bottom status bar shows the mode as "navigation" and the coordinates as 7594380,3151083 with a scale of 1:144448.

# Pakistan Floods 2015

## Layyah & Dera Ghazi Khan Districts

### Description:

This map shows the comparison between the inundation extent as on 26-July-2015 with the pre-monsoon river extent. The area in focus is Indus River through Layyah and Dera Ghazi Khan District, where Medium flood levels prevail. The pre-monsoon river extent is extracted using Landsat-8 15 meters resolution cloud free composite data (01-May-2015 to 30-Jun-2015). The inundation is extracted using MODIS as on 26-July-2015. The information provided in this map is yet to be validated in the field. The map is generated at SACRED-SUPARCO on 26-July-2015.

0 2.5 5 7.5 10 km

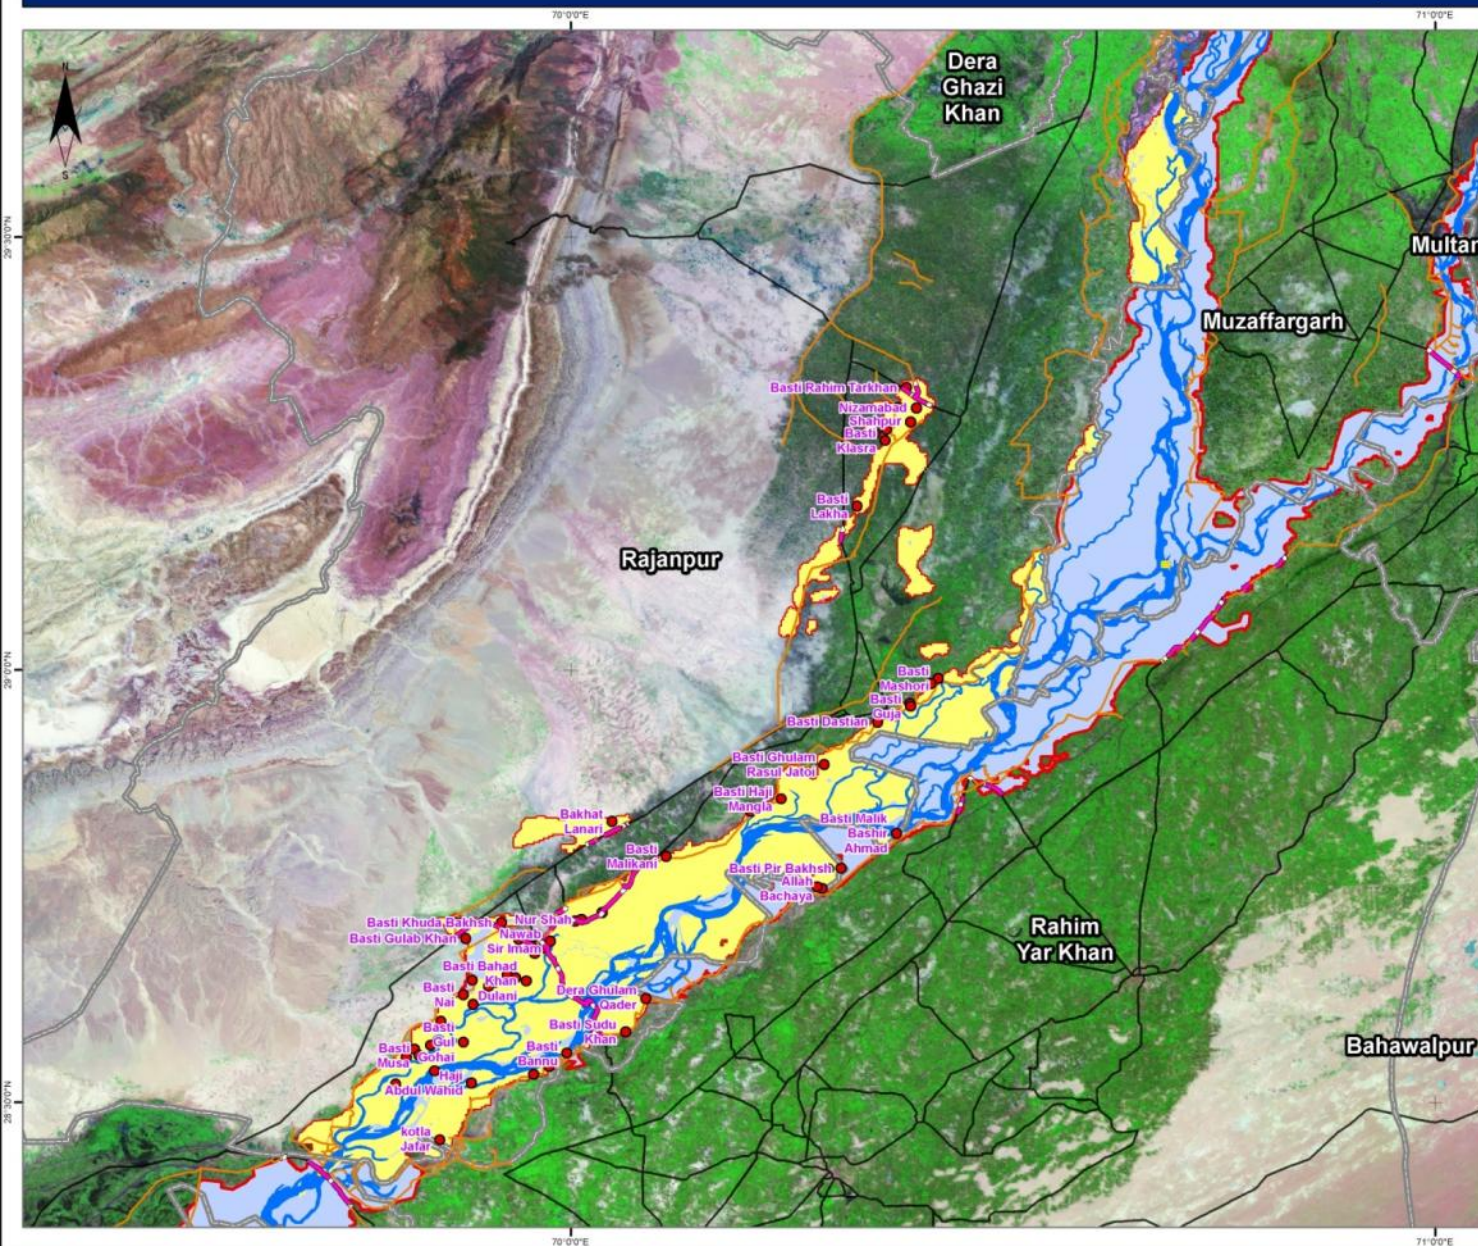

### Legend

- Pre-Monsoon River Extent

# PAKISTAN FLOOD 2015

## RAPID DAMAGE ASSESMENT OF DISTRICT RAJANPUR ON AUGUST 08, 2015

- Legend**
- Settlement (Affected 57)
  - Roads (Affected Length 23.12 Km)
  - Kacha-Pakka Roads
  - Embankments
  - Agriculture (Affected Area 1362.14 Sq Km)
  - Cumulative Inundation Extent
  - Normal River Course
  - Districts Boundary

The map shows rapid damage assessment of District Rajanpur. Statistics of affected agriculture, roads and settlements are based on the cumulative flood extent from 16 July till August 08, 2015. This assessment is yet to be validated in the field. This map is produced at Space Application Centre for Response in Emergency and Disasters (SACRED)-SUPARCO in close coordination with NDMA and PDMA Sindh on August 10, 2015.

SUPARCO is host to the UN-SPIDER Regional Support Office (RSO) in Pakistan

# Pakistan Floods 2015

## Simulated Inundations (Rajanpur, Muzaffargarh & R.Y Khan)

### Description:

The map shows maximum simulated inundation from 11/07/15- 01/08/15 based on observed rainfall/discharge data as on 28/07/15. The area in focus is Rajanpur, Muzaffargarh & R.Y Khan Districts. The simulation also includes forecast inundations simulated on Indus River downstream of Kalabagh. These results are based on the Rainfall-Runoff-Inundation (RRI) model, a 2-D diffusive wave model calibrated on the lower Indus River basin. The simulated extent shows inundations with different depths. This analysis is yet to be validated in the field. This information was produced at SACRED SUPARCO on 29 July, 2015.

# HOUSE DAMAGE ASSESSMENT – FLOODS 2015

**SUPARCO WAS REQUESTED BY THE GOVERNMENT OF PAKISTAN TO ASSIST IN VALIDATION OF HOUSE DAMAGE ASSESSMENT SURVEYS. THE VALIDATED DATA IS THEN USED FOR THE DISBURSEMENT OF COMPENSATIONS BY THE GOVERNMENT.**

# EXPECTATION/FUTURE PLANS

- Participation in Regional TAM Mission
- SUPARCO can provide Resource persons for Flood Modeling trainings
- Participation in Collaborative projects
- Capacity Building in the field of SAR data processing and analysis for Disaster monitoring, mapping and damage assessment especially earthquake and landslide
