INTRODUCTION

Office for Outer Space Affairs (UN-OOSA)

Space technology plays a very important role in improving the quality of life of today's human society for information and decision making. Most noticeable are communication, television, telemedicine, satellite navigation, remote sensing data, weather forecasting, disaster mitigation through emergency mapping, etc. All countries, irrespective of rich or poor, have realised the importance of space technology for improving the living conditions of their citizens. Therefore, all

countries should have access to space technology and must share the equitable benefits. The global satellite data availability has made it possible for all countries to get benefits. However, a major precondition to successful space technology applications is the development of essential indigenous capabilities, particularly human resources. A consensus emerged within the international community that if effective assimilation and appropriate application of space technology are to succeed in the developing countries, efforts must be made at different levels for capacity building in space technology.

Under the auspices of the United Nations, through its Office for Outer Space Affairs (UN-OOSA), six regional centers for Space Science and Technology Education have been established in the following regions: Asia and the Pacific (India and China), Latin America and the Caribbean (Brazil and Mexico), Africa (Morocco and Nigeria) and Western Asia (Jordan). All these Centres are affiliated to the United Nations through UN-OOSA. These Centres use existing facilities and expertise available in education and other research institutions in their respective regions.

THE REGIONAL CENTRE FOR ASIA AND THE PACIFIC IN INDIA

The Centre for Space Science and Technology Education in Asia and the Pacific (CSSTEAP) was established in India in November 1995 with its headquarters in Dehradun and is the Centre of Excellence. The 1st campus of the centre was established in Dehradun, India at Indian Institute of Remote Sensing (IIRS) which is a unit of Indian Space Research Organization (ISRO), Government of India. For conducting its Remote Sensing (RS) & Geographic Information System (GIS) programs, the Centre has arrangements with IIRS as a host institution. The Centre has also arrangements with Space Applications Centre (SAC) Ahmedabad for hosting

Indian Institute of Remote Sensing (IIRS)

programs related to Satellite Communications (SATCOM), Global Navigation Satellite System (GNSS), Satellite Meteorology and Global Climate (SATMET) and Physical Research Laboratory (PRL) Ahmedabad for Space and Atmospheric Science.

The Centre has been imparting education and training, helping participants in developing research skills through its Master's degree and Post Graduate courses. This is achieved through rigorous class-room (theory and hands-on exercises), group discussions, field campaigns and pilot projects in the field of space science and technology. These programs aim at capacity building for participating countries in

designing and implementing space-based research and application programs. The Centre also fosters continuing education to its alumni for advanced research leading to the Ph.D. degree.

“It should be emphasized that the overall mission of the centre is to assist participating countries in developing and enhancing the knowledge and skills of their citizens in relevant aspects of space science and technology in order that such individuals can effectively contribute to national development programmes.”

AFFILIATION TO THE UNITED NATIONS

The Centre has entered into a cooperative agreement with the United Nations which states that the United Nations will cooperate with the Centre by providing expert advice, educational curricula, technical support, necessary documentation and other appropriate support.

EDUCATIONAL PROGRAMME AND COURSES

The educational program of the Centre is oriented towards the dissemination of knowledge in relevant aspects of space science and technology. The aim of the Centre is to deliberate on education and research in the field of space science with emphasis on theoretical studies and hands-on experience on state-of-the-art instrumentation, continuing education and awareness and appraisal programs. The curriculum has been developed under the auspices of the UN Office for Outer Space Affairs (UN-OOSA) and the guidelines emerged from the meetings held for Education Curriculum Development for the Centre at Granada, Spain in February/March 1995. These curricula are reviewed periodically by an International Advisory Committee. The activities of the Centre are guided by a Governing Board, Academic Advisory Committee and respective Board of Studies for each programme.

ACADEMIC ACTIVITIES

The academic activity is divided into two phases. Phase-I is of 9 months duration and executed at the Centre in India. After successful completion of Phase-I, the participants are encouraged to take up Phase-II research project of one-year duration in their home country. Phase-II allows participants to take up research project relevant to their home country or organization and apply the technologies.

If desired by the candidate, then the candidate can submit the one-year research project to Andhra University, Visakhapatnam, India for Master of Technology (M. Tech.) degree. The eligibility criteria of the university will apply.

(i) **Post Graduate (P.G.) Programme:** P.G. Courses of nine months duration are organized in the following disciplines:

- ♣ Remote Sensing and Geographic Information System (RS and GIS) (at IIRS, Dehradun)
- ♣ Satellite Communications (SATCOM) (at SAC, Ahmedabad)
- ♣ Global Navigation Satellite System (GNSS) (at SAC, Ahmedabad)
- ♣ Satellite Meteorology and Global Climate (SATMET) (at SAC, Ahmedabad)
- ♣ Space and Atmospheric Science (SAS) (at PRL, Ahmedabad)

Core Modules (Semester I and II) emphasize on the development and enrichment of the basic knowledge and skills of the participants in the field of space science and technology. This is followed by pilot project, which provides an opportunity to fine-tune the skills for carrying out research in space science.

(ii) **Master's Programme:** This programme gives an opportunity and continuity in developing higher research skills for those who have completed successfully the nine-month P.G. Course. This is subject to qualifying for admission requirements of Andhra University, India. A research project by the scholars is conducted and executed in their respective countries with a view to transferring the technology to his/her organization. It will also be a test of the methodology and knowledge assimilated during phase-I at the centre.

COURSE RECOGNITION BY ANDHRA UNIVERSITY

The Centre is in agreement with Andhra University (est. 1926) Vishakhapatnam, India for awarding M. Tech. degree subject to the eligibility criteria of Andhra University. The terms and conditions of this agreement are reviewed from time to time.

A few meritorious students of the P.G. Course are also considered for award of additional fellowship (six months to one year) to complete part of their research work at Centre's host institutions in India which may lead to an M. Tech. degree from Andhra University. Research

project work needs to be submitted to Andhra University within four years from the date of registration at the Centre for award of M. Tech. degree.

(iii) Short Courses: Besides P.G. level courses, the centre also conducts short term courses of two to four weeks duration in specific themes of above subjects regularly. For further details, you may please visit our website www.cssteap.org.

PROGRAMMES CONDUCTED

As on May, 2017, the Centre has conducted 52 post graduate courses (21 on RS & GIS, 10 each on SATCOM, SATMET, SAS, and 1 on GNSS). The centre has also conducted 48 short Courses and workshops. These educational programs have benefited 1726 participants from 35 countries in the Asia-Pacific region and 29 participants from 18 countries outside the Asia Pacific region. Presently, 22nd RS & GIS course at IIRS Dehradun, 11th SATCOM and 2nd GNSS courses at SAC Ahmadabad are in progress.

ANNOUNCEMENT OF THE 11TH P. G. COURSE IN SPACE AND ATMOSPHERIC SCIENCE

Duration : August 1, 2018 to April 30, 2019
Venue : Physical Research Laboratory,
Navrangpura, Ahmedabad 380 009, INDIA
Number of seats : 20 (Twenty)

IMPORTANT DATES

Last date for Receipt of Applications : March 1, 2018
Information of Selection : April 30, 2018
Commencement of Course : August 1, 2018
Completion of Phase-I (in India) : April 30, 2019

Since the numbers of seats are limited, applicants are advised to process their applications well in advance of the last date to avoid inconvenience.

The list of selected candidates will be available on our website www.cssteap.org by last week of April, 2018. Selected candidates will be intimated to initiate the action for joining the course.

WHO CAN APPLY?

The course is designed towards the scientists, teachers, professionals and specialists of the Asia Pacific region, working in the government, autonomous or university systems and

educational institutes in the field of space science and allied fields, who wish to improve their skills in the field of Space and Atmospheric Science and thereby improve their usefulness to their parent Institutes/Organizations.

It is strongly expected that the participating scholars will be able to:

- ◆ Serve as catalysts for furthering the skills and knowledge of other professionals in their countries.
- ◆ Enhance the self-reliance of their respective countries so as to lessen dependence on external experts.

HOW TO APPLY?

Applications are invited from candidates in countries of Asia and the Pacific Region for the 11th P. G. Course in Space and Atmospheric Sciences. All the candidates need to be nominated/sponsored (i.e. endorsed) by recognized institutions (e.g. ministries or universities in their respective countries). Nominating/Sponsoring institutions/authority should ensure that on return, the scholar will be given opportunity to work in a development-oriented activity in the area of newly acquired knowledge and skills. After successful completion of the P. G. course, if the candidate wants to pursue research towards M. Tech. degree, it is assumed that sponsoring authority will facilitate one-year research project in the home country. However, the Centre will provide long-distance technical guidance. A limited number of short and long- term fellowships may be made available to meritorious participants to complete Phase II Research Project work in India.

Please submit the duly filled application form (attached with this announcement or downloaded from the website www.cssteap.org) through/endorsed/nominated by the CSSTEAP Governing Board member of your country to the Indian Embassy/High Commission in your country (For list of the members, please see inside of the front cover page. Their contact details are in the link www.cssteap.org/governing-board). However, the applicants from non-Governing Board Member countries need to submit completed application forms to the Centre through the Embassy/High Commission of the respective country in New Delhi, India. The application should be completed in all respects and accompanied by attested and/or certified copies of all the certificates (School, Bachelor and Master, TOEFL, English Proficiency, etc.). Wherever these certificates are issued in a language other than English, the same may be translated in English and certified by the Head of the organization or provide English transcription of all such documents.

An advance copy (preferably scanned) should be forwarded to the following address for advance action and follow-up at this end:

Prof. J. Banerji

The Course Director

Space and Atmospheric Science

Room # 762

Physical Research Laboratory,

Navrangpura, Ahmedabad 380 009, INDIA

Telephone # +91-79-2631-4762

Fax # +91-79-2631-4900

Email uncsc@prl.res.in, jay@prl.res.in

Note: Those who are applying for TCS fellowship shall also include a copy of the duly completed form submitted to the Embassy/High Commission of India in their country.

To download application form or to know more about CSSTEAP, its past and future programmes, participants and countries who have benefited from these and the Pilot Projects carried out through these programmes, please visit us at www.cssteap.org.

ELIGIBILITY FOR ADMISSION

The prospective participants should possess a Master's degree in Physics/Astronomy/Astro-Physics/Solar Physics or other equivalent qualification relevant to Space and Atmospheric Science, OR Bachelor's degree in Engineering, (B.E./ B. Tech.) in Electronics and allied fields / Environmental Science/Engineering. Candidates having teaching or research experience would be preferred. Candidates possessing higher qualifications viz. a Ph. D. would also be eligible for admission.

Important and Mandatory: The applicants are advised to bring original documents for verification at the time of reporting in India.

SELECTION PROCEDURE

The Centre will select the candidates through a well-laid procedure, which includes satisfying academic eligibility, proficiency in English language, funding/forwarding by sponsoring authority/organization, country representation, etc. Only selected candidates will be intimated by April 30, 2018 and list of selected candidates will also appear at Centre's web-site (www.cssteap.org). Preference in selection will be given to those candidates whose expenses are borne by the candidate/sponsoring agency. Once a candidate has been sponsored and admitted, the sponsoring authority/organization or candidate need to inform at least 15 days in advance for withdrawal or cancellation of the candidature. If the

sponsoring authority wishes to call back its candidate after joining the Centre or in the middle of the course, the travel cost needs to be borne by either the sponsoring authority or by the candidate. Nominating authority can change the candidate, if so desired by them.

ABOUT HOST INSTITUTE

Physical Research Laboratory (PRL), founded in 1947 by Dr. Vikram Sarabhai, is a premier

Physical Research Laboratory (PRL)

scientific institution under the Department of Space Government of India. As is very well depicted in its logo, *PRL research encompasses the earth, the sun immersed in the fields and radiations reaching from and to infinity, all that man's curiosity and intellect can reveal.* The research activities are multi-dimensional and cover Astronomy and Astrophysics, Solar Physics, Planetary Sciences, Geosciences, Atomic, Molecular and Optical Physics, Space and Atmospheric Sciences and Theoretical Physics.

PRL has four campuses –the main

campus is at Navarangpura, Ahmedabad and the others are at Thaltej, Ahmedabad, the infra-red observatory at Gurushikhar, Mount Abu, and the Udaipur Solar Observatory at Udaipur. PRL is contributing significantly to the scientific manpower development through Doctoral (Ph.D.) and Post-Doctoral programmes, Associateship Programme for university teachers, Summer Programme for M.Sc. students and college teachers and Project Training of Engineering, MCA and Diploma students. PRL alumni have played a key role in building and contributing to the development of other institutions in the country. The Indian Space Research Organization (ISRO) was nucleated in PRL in the early seventies. Two of the past Chairmen of ISRO - Professor U.R. Rao and Dr.K. Kasturirangan - are alumni of PRL. For further details, you may visit PRL website www.prl.res.in

FACULTY

The faculty for the course constitutes experts in different fields drawn from the Physical Research Laboratory, Ahmedabad, a number of ISRO Centres and various research institutes and universities in India and abroad. The core faculty has a strong scientific background with a number of publications, experience of participating in international scientific programs, organizing a number of courses/workshops/symposia, etc. to their credit. A few visiting international experts will also be invited to deliver special lectures.

MEDIUM OF INSTRUCTIONS

The medium of the instructions/teaching is English. Proficiency in written and spoken English is most essential. The candidates who are not proficient in English are advised not to apply. Applicants, who have done their higher studies in a medium (language) other than English, are required to submit TOEFL score or a diploma/certificate of English language issued by an accredited language institution or by the local UNDP for satisfactory establishment of the applicant's competence in spoken and written English language. Preference will be given to those who secure high score in TOEFL examination.

TEACHING METHODS AND FACILITIES

Modern facilities exist at the Centre for class-room teaching and practical instructions/demonstrations. Printed as well as digital course material of the lectures is supplied. The teaching methods include class-room lectures, video lectures, computer-based training packages, laboratory experiments, group discussions, demonstrations, and seminar presentations.

Physical Research Laboratory, Ahmedabad is a premier institution of space research in India. A number of sophisticated experiments like digital ionosonde, high power LIDAR, optical instruments for photometry, spectrophotometry and imaging of day/night airglow emissions, instruments for surface/in-situ measurements of ozone, aerosols, trace gases, conductivity, electric fields in the middle atmosphere and of electron density, ion-neutral composition and electric fields in the ionosphere, form the backbone of the current space research activities. PRL has also acquired highly sophisticated experimental facilities such as the Ion Probe, Stable Isotope Mass Spectrometer, Gas Chromatographs and a state of the art Thermal Ionization Mass Spectrometer (TIMS) for studies in Planetary and Geosciences. A nano-SIMS and a Noble Gas Mass Spectrometer have been commissioned. These instruments are capable of measuring isotopic ratios of different elements very precisely, and will help to study solar system, planetary and geological evolutionary processes and their timescales. A state-of-the-art Isotope Ratio Mass Spectrometer has been set up under IWIN project, which can measure the isotopic ratios of heavier and lighter isotopes.

For astronomy and Solar Observations, two dedicated Observatories, one operating in Infra-red and other in visual bands are there at Mount Abu and Udaipur, respectively. An ambitious research plan for the next five years has been drawn up and space-based experiments in Astronomy, Atmospheric and Planetary Sciences are proposed. Computer facilities include a number of high power workstations with a large number of PCs connected through network with connectivity to Internet. PRL hosts an excellent library with a large collection of books and periodicals in varied fields of Space and Atmospheric Sciences.

Mt Abu Infra-red Observatory

Udaipur Solar Observatory

SCIENTIFIC AND SIGHTSEEING TOURS

As part of the programme, the students are taken on scientific tours to selected national centres of excellence in Space and Atmospheric Science. They also take part in festivals and visit historical sites.

PERFORMANCE EVALUATION

The performance of the participants is assessed through written, interactive sessions and/or computer-assisted practical exercises. Independent assessments of theory exams are conducted by external and internal faculty. However, the practical examination is conducted jointly. The participants need to pass each examination paper.

AWARD OF DIPLOMA/DEGREE

On successful completion of the Phase-I study, i.e. 9-month course, the participants will be awarded Post Graduate Diploma. Certificate of Attendance will be given to the candidates who fail to clear the examination. If the participant is able to complete Phase-II Project work (i.e. one-year research project in home country), satisfactorily within four years of joining the PG course, the work can be submitted to the Andhra University (India) for award of M. Tech. degree.

COURSE EXPENSES

The over-all expenses of the course are given below. This does not include the international travel (to and from city of the course participant to course venue):

Course Fee:	US \$ 6000 per participant
Local tours:	US \$ 1200 per participant
Living expenses:	US \$ 1100 per participant

The participants are expected to find suitable sponsorships or funding for meeting the expenses while attending the course in India.

FINANCIAL ASSISTANCE FROM GOVERNMENT OF INDIA

For this course, Government of India (GOI) has offered to bear the course fee of US \$ 6000 per participant **from the Asia-Pacific region** selected by the Centre. Thus no course fee is payable by the selected participants from the Asia-Pacific region. **GOI will provide financial assistance as mentioned** below:

Living expenses in India:	INR 16,000 per month for the duration of 9 months.
Book allowance:	INR 2,000 (one time)
Project allowance:	INR 1,500 (one time)
Study tours	INR 50,000

The Centre is trying to obtain financial assistance for international travel for a limited number of participants of the Asia-Pacific region through agencies like UN Office for Outer Space Affairs (UN-OOSA), UN Economic and Social Commission for Asia and the Pacific (UN-ESCAP). UN-ESCAP has been supporting over the years the CSSTEAP education programmes and has extended travel grants to a good number of CSSTEAP course participants since its inception. This contribution by UN-ESCAP is highly supportive to the overall CSSTEAP activities.

FINANCIAL ASSISTANCE THROUGH TCS

This course is approved by the Ministry of External Affairs. Government of India under its TCS of Colombo Plan Fellowship for the foreign nationals from Afghanistan, Bangladesh, Bhutan, Fiji, Indonesia, Iran, Republic of Korea, LAO PDR, Malaysia, Maldives, Mongolia, Myanmar, Nepal, Papua New Guinea, Philippines, Sri Lanka, Thailand and Vietnam. The fellowship covers to and fro international travel and other training related expenses. The applicants from the above countries are encouraged to apply for TCS Fellowship. The

details of this fellowship and prescribed application form may be obtained from the Embassy/High Commission of India in the home country of the candidates and duly completed form need to be submitted to them. Simultaneously, they are required to send their bio-data on the CSSTEAP prescribed application form, appended in the announcement brochure, to Director CSSTEAP, along with a copy of duly completed TCS fellowship form submitted to Embassy/High Commission of India in their country.

Candidates proposing to avail the GOI Fellowship and the international travel assistance have to specifically request for the same in Application Form. Candidates who are not offered GOI Fellowship and travel assistance, will have to make their own arrangements for living expenses and international travel.

INSURANCE

Medical, life and disability insurance should be undertaken before reaching India, by the participants themselves or on their behalf, by their sponsoring institute/organisation for covering entire health and disability risks. No medical expenses will be borne by the Centre. However, participants who receive the Fellowship of the GOI will be paid medical expenses for minor ailments on actual basis (as outpatients only) as and when such expenses are incurred after recommendation by authorised medical doctor of Physical Research Laboratory. The centre will have only limited liabilities as far as medical expenses are concerned in such cases. Candidates must clearly specify if they are suffering from any health disorders which may affect their study programmes. Candidates in sound physical and mental health only need to apply. Participants, who are not covered by appropriate Medical insurance while in India, would be required to take a Medical Insurance policy in India by themselves.

If any medical information requiring attention is kept hidden and found out during the course, the centre will be compelled to send the candidate back home and all expenses towards the same will be borne by the candidate/sponsoring organisation.

LIFE AT CENTRE

Accommodation for the participants only will be arranged in international hostel on single occupancy basis with independent kitchenette. The campus is equipped with good living facilities like gymnasium, tennis court, etc. A sum of Rs. 1500/- per month is to be paid by each participant towards accommodation charges. Boarding and other expenses such as cooking gas are to be borne by the participants. Spouse/no other person will be allowed to stay along with the candidate in the hostel during the entire tenure of the course. Staying in hostel is compulsory for all the participants and staying outside is strictly not allowed.

The international hostel will provide an opportunity for the participants to interact and share their knowledge and cultural values. India is a country of festivals. So, the participants will also get to know about different colourful festivals throughout the year. The 9-day dance festival of Garba (October-November), followed 20 days later by the light and cracker festival of Diwali, the kite festival of Makara-sankranti (January) and the colour festival of Holi (March) are occasions to enjoy.

ABOUT THE CITY

Ahmedabad is named after Sultan Ahmed Shah who founded this city in 1411 AD and graced it with splendid monuments. It is a great textile and commercial centre and was called the 'Manchester of India' in the past. Ahmedabad is today a prosperous, thriving city, the second largest in western India. The city is associated with Mahatma Gandhi, the apostle of peace and non-violence whose Ashram or retreat, on the banks of the river Sabarmati is now a place of national pilgrimage.

Ahmedabad's long and prosperous historical past has given it a rich architectural legacy. The earlier monuments of the city date back to the pre-Mughal Muslim Sultans of Gujarat who founded the city and embellished it with mosques and mausoleums in mellow, honey coloured sandstone to create what is now known as the Indo-saracenic style of architecture - a rare and happy blend of Muslim and Hindu styles.

With growing wealth and affluence, the textile magnates of Ahmedabad added new architectural marvels to their city. The ancient skills of temple building were revived with the construction of Jain temples in and around the city, superbly carved, sculptured and ornamented in pure white marble. And thanks to their progressive and sophisticated patronage, Ahmedabad acquired some of the most striking and excitingly contemporary architecture in India. Many of Ahmedabad's new buildings bear the signature of such world-celebrated architects as Le Corbusier and Louis Kahn and India's Doshi and Correa.

In July 2017, the Historic City of Ahmedabad or Old Ahmedabad, was declared as India's first UNESCO World Heritage City.

Life in Ahmedabad reflects the variety and continuity of its traditions. The crowded bazaars and chowks of the old city are awash with the ebb and flow of people buying and selling Gujarat's traditional handicrafts, hand-painted and block-printed cloths, brass utensils, woollen rugs and shawls, wooden chests and silver jewellery.

It is also the home of many premier academic and cultural institutions, mainly due to the vision of Vikram A. Sarabhai, who was the founder of PRL. Prominent among them are Ahmedabad Textile Industries Research Association, National Institute of Design, Indian Institute of Management, Institute of Indology, Vikram Sarabhai Community Science Centre and Darpana Academy of Performing Arts apart from PRL and Space Applications Centre

(SAC). The city is well connected by rail, road and air with all major cities in India. There are daily air services from Delhi, Mumbai, Chennai, Kolkata and Bengaluru. PRL is situated about 8 km from the railway station and about 15 km from the airport.

Weather

The weather of Ahmedabad is predominantly warm throughout the year except for brief cold spell during the second half of December and the month of January, when minimum temperatures may go to 4-6° Celsius for a few days. Light woollens are advised during this period.

Rainfall:

Annual Average	780 mm (mostly during 15 June - 15 September)
Highest	1997 mm in the year 1927
Lowest	214 mm in the year 1918

Temperature

Highest:	47.8°C on 27 th May, 1916
Lowest:	2.2°C on 6 th February, 1920

SPACE AND ATMOSPHERIC SCIENCE COURSE AT A GLANCE

The course consists of two phases. Phase-I is of 9 months duration. Successful completion of this phase leads to the award of a Post-Graduate (PG) diploma by the Centre whereas Phase-II is a one-year research project for a Master of Technology (M.Tech.) degree from Andhra University (AU), Visakhapatnam, India.

PHASE-I: NINE-MONTH PG DIPLOMA COURSE

The Space and Atmospheric Science (SAS) Post-Graduate Diploma course of 9 months duration is spread over two semesters. There are 5 theory papers and 10 related laboratory experiments in the first semester, while 4 theory papers and 10 experiments are to be completed in the second semester. Introductory lectures on topics covering all the branches of space science and technology are delivered in the beginning of the course for about one or two weeks. The course ends with a pilot research project of two months. A brief description of the course content is as follows:

THEORY:

Semester 1: 5 papers, 200 Marks each

Paper 1: Earth's Atmosphere and Climate Change (4 credits, 40 hrs)

Topics covered: Concepts of Earth's Atmosphere (10 hrs), Effects of Solar Radiation on Atmosphere (5 hrs), Aerosols, Greenhouse Gases and their effects on Radiation Budget and Climate Change (15 hrs), Dynamics of Earth's Atmosphere (10 hrs)

Paper 2: Ionosphere and Radio Communication (4 credits, 40 hrs)

Topics covered: Structure and Variability of Earth's Ionosphere (13 hrs), Ionospheric Plasma Dynamics (13 hrs), Electromagnetic Wave Propagation in Ionosphere (14 hrs)

Paper 3: Planetary Science and Exploration (4 credits, 40 hrs)

Topics covered: Atmospheres of other Planets and Satellites (10 hrs), Ionospheres of Planets and their Satellites (10 hrs), Solar System Objects and their Exploration (8 hrs), Data Analysis Techniques (12 hrs)

Paper 4: Ground-Based Experiments for Near-earth Environment (4 credits, 40)

Topics covered: Radio Antenna (12 hrs), Radio sounding (12 hrs), Optical Techniques (10 hrs), Airglow (6 hrs)

Paper 5: Space Instrumentation (4 credits, 40 hrs)

Topics covered: Launch Vehicles, Satellites and their Orbits (5 hrs), Attitude Control, Power and Thermal systems of Spacecrafts (10 hrs), Selection of Materials for Space – borne payloads (5 hrs), Reliability, Tests and Qualification of Payloads for Space Experiments (5 hrs), Telemetry, Tracking, Command (TTC hrs) and Data Handling System (5 hrs), In Situ Techniques on Space Platforms (10 hrs)

Semester 2: 4 papers, 200 Marks each

Paper 6: Sun and Space Weather (6 credits, 60 hrs)

Topics covered: Elements of Solar Physics (20 hrs), Origin of Magnetic Field of Earth (10 hrs), Magnetosphere of Earth (10 hrs), Phenomena in Magnetosphere (10 hrs), Space Weather and its Effects (10 hrs)

Paper 7: Stellar and Galactic Astronomy (4 credits, 40 hrs)

Topics covered: Introduction to Astronomy (10 hrs), Introduction to Astrophysics (10 hrs), High Energy Astrophysical Processes and Phenomenology (12 hrs), Basics of Radio Astronomy (4 hrs), Radio Sources (4 hrs)

Paper 8: Electronic Devices and Detectors for Space Instrumentation (2 credits, 20 hrs)

Topics covered: Electronic Devices (10 hrs), Detectors (10 hrs)

Paper 9: Space Exploration (4 credits, 40 hrs)

Topics covered: Space Missions (20 hrs), Astronomical Instruments and Observing Techniques (20 hrs)

PRACTICAL : (2 Credits in each semester)

In addition to theory classes, participants spend considerable time in carrying out various practicals involving laboratory works. In these, they conduct various experiments under supervision of experts at host institution. The students perform 10 Practicals in each Semester. The suggested list of Practicals is given below:

Semester I: *Measurement Techniques for Near-Earth Environment*

- 1 Simultaneous study of total ozone, water vapour and aerosol optical depth
- 2 Measurements of Aerosols
- 3 Optical Depth Measurement Using Filter Photometer
- 4 Surface Monitoring of trace gases
- 5 Balloon-borne measurements of Atmospheric Ozone
- 6 Cloud dynamics using Ceilometer
- 7 Measurement of Atmospheric Temperature by NdYag Lidar
- 8 Multi-wavelength Airglow Photometer
- 9 Airglow Imaging
- 10 Ionospheric Sounding using an Ionosonde/Digisonde
- 11 Effect of solar X-ray flare on Ionosphere
- 12 Study of Ionospheric Scintillations
- 13 Total Electron Content measurements using GPS receiver
- 14 Equatorial Anomaly using TVM Data
- 15 Study of Acoustic Detectors

Semester II: *Measurement Techniques for Solar and Stellar Astronomy*

- 1 Characterization of X-ray detector
- 2 Measurement of geo-magnetic field
- 3 Measurement of Sun's photospheric temperature
- 4 Study of solar rotation
- 5 Determination of Heliographic Coordinates

- 6 Sunspot area and number
- 7 Solar magnetic field
- 8 Light Curve of Variable Star
- 9 Radio Pulsar Studies using GMRT/OSRT
- 10 Polarization & directivity of Radio Antenna
- 11 Radiation properties of Radio Antenna
- 12 Plotting HR diagram of star clusters and finding their distances.
- 13 Finding abundance in stellar atmosphere of a few elements using curve of growth.
- 14 Finding plate scale for a telescope.
- 15 Measurement of star size by lunar occultation

SEMINAR : (2 Credits in each semester)

Besides theory and experiments, short presentations (10 minutes each) are made by students in any of the topics covered in the syllabus.

PILOT PROJECT: (2 months, 4 Credits)

Each student will carry out research work using observation, analysis, modelling and simulation on his/her topic of interest after consultation with the supervisors in India as well as in the home country. During this two-month period, the student will be guided by an Indian supervisor and get a) guidance on the line of action to be pursued at home, b) all the necessary experimental data if required and c) the necessary software tools, etc.

If the student is eligible and wants to pursue M. Tech. under Andhra University, he/she will have to carry out one year research project at home for which the pilot project will initiate the foundation.

PHASE II: ONE YEAR PROJECT

The students who successfully finish their PG course and are interested in continuing for a Master of Technology (M.Tech.) degree, the Centre offers the opportunity to do so, in collaboration with Andhra University (AU) in Visakhapatnam, India. To this end, the student will have to carry out an approved project in his/her home country for a period of one year. This is to be formulated jointly by the scholar and his/her advisor at the Centre during Semester II of Phase I in an area relevant to the interest of the sponsoring institution/country. The sponsoring institution/country is obliged to guarantee on the return the scholar would remain in a suitable position with commensurate and progressive remuneration and other entitlements for a minimum period of 3 years and will be provided with all facilities to carry out the work. This course programme will be considered complete on acceptance/approval of the submitted project report.

ABOUT ANDHRA UNIVERSITY

Andhra University (AU)

Andhra University was established in 1926. It is a premier institute of higher learning and it became a trendsetter in higher education and university administration. It is accredited with 'A' Grade by National Assessment and Accreditation Council of India and has ISO 9001:2008 certification for its quality standards. The University is strong in all faculties and was headed by great personalities like

Sir C.R. Reddy, and Dr. Sarvepalli Radhakrishnan and others as Vice-chancellors.

Andhra University is considered to be one among the 14 best Universities in India in terms of Research by the Department of Science and Technology, Govt. of India.

Andhra University also offers Ph.D. programmes in various specialisations of contemporary interests by all the departments.
