

EVIDENZ

Round table 2: Understanding drought risk

EVIDENZ mid-term workshop

21-22.09.2017

UN Campus, Bonn, Germany

Guiding questions

- How can we improve hazard –based drought characteristics with vulnerability assessments?
- How can we embed risk / impact information better to decision support (e.g. early warning, activation of safety nets)?
- Which data / information is missing to allow better understanding of drought risk at the national level?
